

AirO Film[®]
breathe eAsier

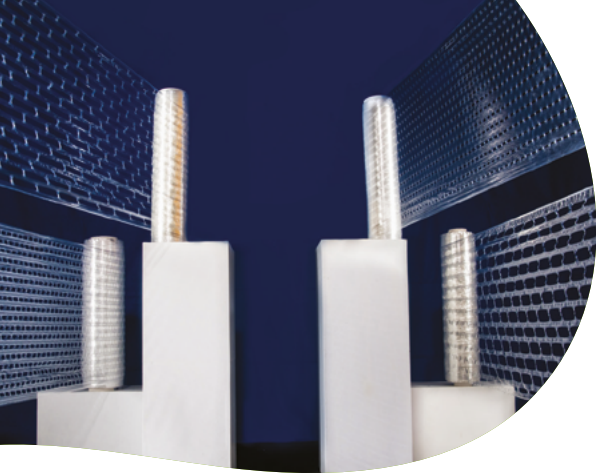

High Performance Perforated Stretch Film

A Problem Solver

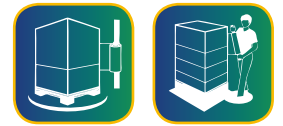

Maximum aeration

Eliminates condensation

Pre-Stretched AirOFilm®

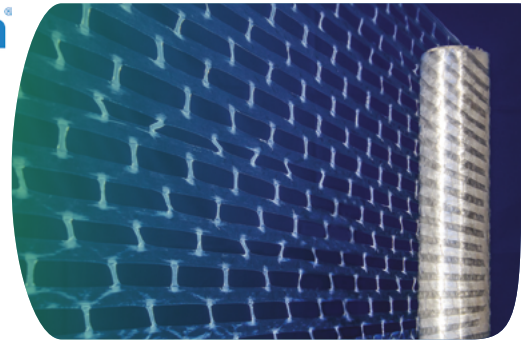

AirOFilm®
Standard

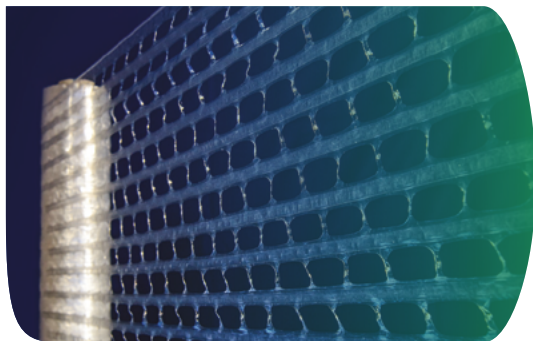

AirOFilm®
Standard Lite

AirOFilm®
Manual

AirOFilm® Standard & Standard Lite (for lighter loads) and **Manual** are breathable vented stretch films designed for either hand use or semi-automatic wrapping machines with no power pre-stretch rollers combining maximum elongation and high tensile strength. AOF Standard is a stiff film that can handle the heaviest loads with absolute security during transportation.

AirOFilm®
Agri

AirOFilm® Agri is ideal mostly for fruit & vegetables wrapping and for the Agricultural Industry in general for both manual and machine applications. It is designed with large openings that give maximum aeration. Not only does this prevent damage but it also allows the product to ripen naturally.

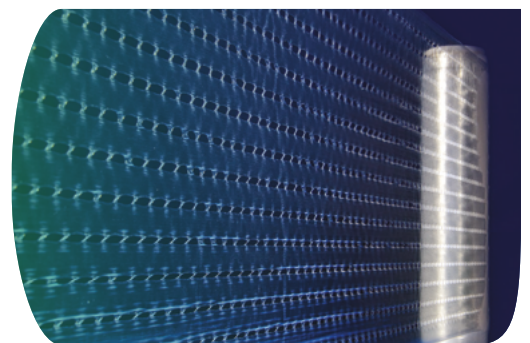

AirOFilm®
Maxx

AirOFilm® Maxx has been designed to cope with extremes. It has a unique structure that allows the maximum amount of air to circulate - up to 60%! This vented stretch film is ideal for heavy pallet wrapping of hot, chilled or frozen products that need maximum aeration.

AirOFilm®
Flowra

AirOFilm®
Flowra Lite

AirOFilm® Flowra & Flowra Lite (for lighter loads) are specially designed for floricultural market for both manual and machine use. They help to maintain a controlled environment and protects the load, ensuring that leaves and flowers remain within the trolley and that the load always arrives in the best possible condition.

AirOFilm® Product Series and **ORO™** Concept are MEGA PLAST Industrial-Exporting S.A. brands. In an effort to improve our products, our company reserves the right to modify any of the technical specifications included here without giving any notice.

AirOFilm® Stretch Lite
Stretch Lite 150
Stretch Lite 200
Stretch Lite 250

The **AirOFilm® Stretch & Stretch Lite** (for lighter loads), are perfect for products wrapped on either semi or fully automatic wrappers that are fitted with power pre-stretching systems with **pre-stretch 150%, 200% and 250% stretching**.

These films have a unique structure: > the reinforcing strips are distributed evenly across the width of the films, the holding pressure is evenly displaced, thus preventing the load from being pinched and eventually damaged.
